

ANJU SAINI

Data Analyst | Business Analytics | ETL & Reporting

Gurugram, Haryana | anju.saini123123123@gmail.com | +91-90531-63133 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Analyst with 4+ years of experience driving business intelligence using SQL, Python, Power BI, Tableau, and Azure Data Factory. Proven record of building ETL pipelines and KPI dashboards — reducing reporting time by 40% and improving query performance by 30%. Skilled in predictive modelling, A/B testing, and stakeholder reporting; completing PGP in Data Science & Business Analytics (Great Learning | University of Texas at Austin).

TECHNICAL SKILLS

- **Programming:** Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, SciPy, XGBoost, Statsmodels)
- **Databases:** MySQL, PostgreSQL | SQL: Joins, CTEs, Window Functions, Subqueries
- **BI & Viz:** Power BI (DAX, Power Query), Tableau, Advanced Excel (VLOOKUP, XLOOKUP, INDEX-MATCH)
- **Data Eng:** ETL Pipelines, Azure Data Factory, Data Extraction, Transformation & Loading
- **Analytics:** KPI Analysis, Regression Modelling, Predictive Modelling, A/B Testing, EDA
- **Concepts:** Data Modelling, Data Warehousing, Business Intelligence, Stakeholder Reporting
- **Tools:** Git, GitHub, Jupyter Notebook, VS Code, Azure Cloud

PROFESSIONAL EXPERIENCE

Primotech

Oct 2023 – Mar 2025

Data Analyst Associate

- Analysed 500K+ records using SQL & Python, reducing reporting time by 40% and delivering actionable business insights to stakeholders
- Built Power BI & Tableau KPI dashboards; optimised SQL queries (CTEs, window functions) improving data retrieval performance by 30%
- Engineered ETL pipelines via Azure Data Factory for data extraction, transformation & loading, ensuring data quality across all reporting systems
- Applied regression modelling and statistical analysis to identify trends, support predictive modelling and data-driven decision-making

Codeinit / Techangouts

Apr 2021 – Aug 2023

Software Developer – Data Focus

- Designed MySQL & PostgreSQL databases for backend systems; built and validated data pipelines ensuring accuracy of BI and stakeholder reporting data
- Optimised SQL query performance by 20%, reducing data retrieval latency across business intelligence and reporting tools

KEY PROJECTS

Health Risk Prediction Model | Python, Pandas, Scikit-learn, Matplotlib

Oct 2024 – Mar 2025

- Built ML classification models achieving 87%+ accuracy; applied feature engineering and EDA to improve model performance
- Evaluated models using F1-score & AUC-ROC; delivered insights through data visualisation and stakeholder reporting

Trend Analytics Platform | Python, SQL, Azure Data Factory, Tableau

Aug 2024 – Feb 2025

- Engineered end-to-end ETL pipelines via Azure Data Factory; automated workflows reducing manual reporting effort by 60%
- Built interactive Tableau KPI dashboards for real-time trend monitoring and business intelligence reporting

EDUCATION

Post Graduate Program — Data Science & Business Analytics

Apr 2025 – Feb 2026

Great Learning | University of Texas at Austin

MCA — Master of Computer Applications

Jun 2018 – Mar 2021

Guru Jambheshwar University
